Power Solution Specialist

CNM Series Rack-mounted Modular UPS Three Phase In Three Phase Out 10~120KVA

Superior overload capacity

Superior overload capacity to make the power supply system more reliable.

User-friendly design

LCD liquid crystal display, which can display the working status and parameter information of UPS in real time, facilitating user management of UPS;

Grid friendly

Energy saving green power with high input po

Energy saving

der normal use, the product will not cause harm to

Product Description

CNM series rack-mount modular UPS uninterruptible power supply system is a highly reliable product designed to meet the higher requirements of power systems. The system adopts on-line double-conversion structure and three-in-three-out operation mode; the power system consists of multiple individual power modules connected in parallel and operates under the condition of no main synchronisation, which realises N+X parallel redundancy backup work and greatly improves the reliability of the system as a whole;

Main Feature

- Mounted in 19 inch rack, or stand alone
- 7 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Extreme high power density, 20KW in 2U, friendly for space and maintenance
- Option of 30A charger module for long backup applications

All-in-One

Intelligent Power Distribution System

for data center

Superior overload capacity

perior overload capacity to make the powe supply system more reliable.

Grid friendly

factor and low THDi.

Product Description

The All-in-one intelligent power distribution system of Coolnet Digital Energy Data Center is a new generation of highly integrated power supply and distribution system adapted to modular data centers based on the new intelligent modular UPS platform. It integrates UPS host, IT power distribution, air conditioning power distribution, lighting power distribution, Mains electricity ATS, UPS input power distribution and UPS output power distribution into one cabinet, and has the characteristics of simple and easy maintenance, high reliability and high efficiency, it can provide safe, stable and pure green power supply for data center load.

Main Feature

- Maximum support for 180kVA integrated UPS power supply and distribution
- Built in 30kVA/30kW module, with a height of only 2U
- The system capacity supports phased deployment, power module, bypass module can be quickly replaced, easy to maintain.
- UPS, UPS input and output cabinets, precision power distribution cabinets and 3 cabinets are integrated, saving about 68% of floor space and more than 55% of installation hours.
- System efficiency up to 96%, energy efficient
- Intelligent detection of distribution branch, full display of power supply link.

CNM Series Intelligent Modular UPS Three Phase In Three Phase Out 25~300kVA

The UPS will switch to battery mode when the mains power is normal Zero time, which can effectively ensure the safety and reliability of the instrument.

Product Description

The CNM series modular UPS provides the most compact footprint of less than 2m² with maximum capacity of 900kVA.With best reliability and high performance, it has been leading the domestic market for years.CNM series is considered to be the best power protection solution for large data centers, as well as for sensitive electronics.

Main Feature

- Fully digital control, flexible and robust.
- 10 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Extreme high power density, 30kW in 2U, friendly for space and maintenance.
- Option of 30A charger module for long backup applications

CNM Series Intelligent Modular UPS Three Phase In Three Phase Out 50~600KVA

Superior overload capacity

Superior overload capacity to make the powe supply system more reliable.

Load power factor of 0

Adapts to the characteristics of most current electrical equipment and increases the load carrying capacity of the machine.

User-friendly design

LCD liquid crystal display, which can display the working status and parameter information of UPS in real time, facilitating user management of UPS;

Grid friendly

rgy saving green power with high input pov

Main Feature

- Fully digital control, flexible and robust.
- 7&10 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Intelligent system self-diagnosis, rich fault recording, large capacity of history recordstorage space
- Maximum system capacity up to 1.8MVA, the best solution for mega data center

Applications

Government, Finance, IT, Education, Transportation, Broadcasting, Medical, Energy, etc.

CNM Series Modular UPS Three Phase In single Phase Out 12~72KVA(208V)

Zero Switc

The UPS will switch to battery mode when the mains power is normal Zero time, which can effectively ensure the safety and reliability of the instrument.

User-friendly design

LCD liquid crystal display, which can display the working status and parameter information of UPS in real time. facilitating user management of UPS:

DSP

DSP digital control technology

All power conversion links such as rectification, inverter charging, and discharge are digitally controlled.

Can be used with a generator

The wide range of input voltages and frequencies plates the bad power generated by the generator to provide a pure, stable power supply to the load.

Main Feature

- Mounted in 19 inch rack, or stand alone
- 7 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Extreme high power density, 20KW in 2U, friendly for space and maintenance
- Option of 30A charger module for long backup applications

Applications

Government, Finance, IT, Education, Transportation, Broadcasting, Medical, Energy, etc.

- Mounted in 19 inch rack, or stand alone
- 7 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Extreme high power density, 20KW in 2U, friendly for space and maintenance
- Option of 30A charger module for long backup applications

Applications

Government, Finance, IT, Education, Transportation, Broadcasting, Medical, Energy, etc.

HEFEI COOLNET POWER CO.,LTD

Model CNM	72/18-L 108/18-L				
Rate Power	72KVA/72KW	108KVA/108KW			
Main input					
Input	3P5W(3F	P+N+PE)			
Rate Voltage	200/208/22	20VAC(L-L)			
Rate Freq.	50/6	0Hz			
Input PF	>0.	99			
Current Distortion	THDi<3%(100% Linear load)				
Voltage Range	166-261VAC(L-L)full load; 125- 166VAC (L-L) power derate from 100% to 75%				
Freq. Range	40-7	0Hz			
Battery					
Rate voltage	±120	VDC			
Charging Capacity	20%*	Pout			
Charging Accuracy	±1	%			
Bypass					
Rate Voltage	200/208/22	20VAC(L-L)			
Voltage Range	Range: -40%- +25%, Setta	ıble, default -20% ~ +15%			
Overload	10%, long time operation; 110%< load<125%, 5 m	nins; 125%<1oad<150%, 1 min: >150%, 1 second			
Inverter					
Rate Voltage	200/208/22	20VAC(L-L)			
Rate Freq.	Range: -40%- +25%, Setta	ble, default -20% - +15%,			
Output PF	1	L			
Voltage Accuracy	±1.0%				
Load Response	<5%(20%-80%-	20% step load)			
Recovery Time	<20ms (0%- 100% -0% step load)				
Output THDu	<1%(linear load),<5%(non-linea	r load according to IEC 62040-3)			
Overload	110%,1 hour;125%,10 mins;	150%,1 min; >150%,200ms			
Frequency Accuracy	0.:	1%			
Synchronize Window	Settable, +0.5Hz-±	5Hz, default +3Hz			
Slew Rate	Settable, 0.5Hz/S-3H	z/S, default 0.5Hz/S			
Phase Accuracy	120°:	± 0.5°			
System					
Efficiency	Normal Mode≥96%	;Battery Mode≥96%			
Display	LED + 7 incl	h touch LCD			
Certification- Safety	IEC62040-1	JEC60950-1			
Certification- EMS	IEC62040-2;IEC61000-4-2(ESD);IEC61000-4-3	(RS);IEC61000-4-4(EFT); IEC61000-4-5(Surge)			
IP Degree	IP	20			
Configuration	USB, RS232, RS485, Dry contact, Cold start				
Option	SNMP card, AS400 card, Parallel kit, LBS, Air filter, Bottom entry kit, Wheels kit				
Environment	0-40°C(operation);-25~70(storage)	·			
Noise(dB)(1 meter)	65dB @ 100% load	, 62dB @ 45% load			
Dimention	1	-			
Cabinet(W*D*H)mm	482*816*796(18U,wheels not included)	482*816*1018(23U,wheels not included)			
Module(W*D*H)mm	440*678	l 3*85(2U)			
	1.10 070	V - 1			

CNM Series Modular UPS Three Phase In Three Phase Out 36~360KVA(208V)

Superior overload capacity

Superior overload capacity to make the powers

User-friendly design

LCD liquid crystal display, which can display the working status and parameter information of UPS in real time, facilitating user management of UPS;

Load power factor of 0.

Adapts to the characteristics of most current electrical equipment and increases the load carrying capacity of the machine.

Can be used with a generator

The wide range of input voltages and frequencies plates the bad power generated by the generator to provide a pure, stable power supply to the load.

Main Feature

- Fully digital control, flexible and robust.
- 7&10 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Intelligent system self-diagnosis, rich fault recording, large capacity of history recordstorage space.
- Support 200 / 208 / 220V, 50 / 60Hz power grid system, to provide the ideal power supply quality and load protection.

Applications

Government, Finance, IT, Education, Transportation, Broadcasting, Medical, Energy, etc.

CNM Series Modular UPS Three Phase In single Phase Out 60~720KVA(480V)

Superior overload capacity

Superior overload capacity to make the powe supply system more reliable.

User-friendly design

LCD liquid crystal display, which can display the working status and parameter information of UPS in real time, facilitating user management of UPS;

Energy savin

Inder normal use, the product will not cause harm to

Double conversion pure

The intelligent slots offer a wealth of expandable functions with the option of IS-B cards, AS400 cards, c-monitoring cards, SNN cards, RS485 cards, Elegyironmental monitoring cards

Main Feature

- Fully digital control, flexible and robust.
- 7&10 inch touch LCD, with IoT functions
- High reliability and environment adaptability, with protection of components level
- Intelligent system self-diagnosis, rich fault recording, large capacity of history recordstorage space
- Maximum system capacity up to 1.8MVA, the best solution for mega data center

Applications

Government, Finance, IT, Education, Transportation, Broadcasting, Medical, Energy, etc.
